

RESI-4DO-ETH

Our powerful IO module for a MODBUS/TCP or ASCII text socket protocol host with Ethernet interface. The IO module offers four independent digital outputs for DC signals with external power supply.

Functionality
 IO module with 4 digital output for DC signals.
 Common root contact for all four outputs.
 Each output is protected against thermal overheat and shortcut.
 Output group is galvanic-ally insulated from rest of module.
 External power supply for all outputs.
