# WHO WE ARE

Founded in 1990 and based in Graz, Austria (EU), RESI dedicated itself entirely to the field of building automation since 2004. Today RESI can draw on more than 600 products, that have been developed and produced over the years for the project business.

Our products are aimed at every system integrator or software manufacturer. As an international supplier with a wide range of products for building or plant automation, energy monitoring or infrastructure surveillance and the IoT cloud business, we see ourselves as a FULL-OUTFITTER in the world of building automation.

- wide product range
- ALL areas of building automation
- simplicity & flexibility in usage
- made in Austria/EU
- HIGH quality
- long term availability
- fast distribution worldwide
