

1 + 1 = 3 WHAT?

Because we **add more** to your business than only OEM devices to your solution...

YOUR LOGO

We put your logo & your order number & your product label design onto our products to create an unique product for the best fit in your existing product portfolio.

SAVE YOUR TIME

Don't mess your precious time in developing gateways or IO modules, which are not part of your core business. Extend with our well known & tested products your portfolio and create a one stop shop experience for your clients.

Choose from **300+ ready-to-use products...**

MBUS – DALI 1.0/2.0 – KNX – DMX – ENOCEAN – SMI – USB gateways
IO modules
Raspberry Pi IoT controller
Raspberry Pi IoT touch controller

EXPAND YOUR BUSINESS

Grow your sales organically with cross-selling.
Bound your clients to you and your distribution channels in offering almost "home made" products.
Complete your portfolio with our products.

OUR SERVICE
